

AT&T Fleet Complete® Asset Tracker Brief

No matter what business you're in, missing, lost or stolen assets can cost you time and money. AT&T Fleet Complete Asset Tracker enables you to track and manage your high-value assets; helping you to save money and run your business more effectively. Whether your business uses trailers, containers, construction equipment, or other portable equipment, you'll always know where your assets are and what they are doing. With additional sensor readings you can be instantly alerted in cases of unauthorized activity, such as open doors, fuel theft, and usage of power take-off equipment.

Tracking for any asset

- **Transportation equipment:** assets that move daily or sit for long periods, such as trailers and shipping containers
- **Mobile office or storage:** assets that stay on site for long periods, such as construction offices or storage containers
- **Unpowered construction or field service equipment:** assets that change locations intermittently, such as pumps, compressors, and generators
- **Powered construction equipment:** assets that move on site and between sites, such as bobcats, backhoes and cranes
- **Refrigerated trailers:** trailers and containers that require climate control monitoring

Tracking technology adapted to your needs

AT&T Fleet Complete Asset Tracker adapts its operation to your asset's current status; changing transmission modes based on whether your asset is stationary or on the move.

- **Stationary without power:** transmits location once a day
- **Stationary with power:** transmits location every 4 hours
- **Moving with or without power:** starts transmitting on motion after 5 minutes, and continues to transmit every hour until motion stops*
- **Device is tampered with or a significant change in sensor** data values:** immediately transmits an alert along with location and status information

* Motion-enabled setting. Frequency of transmission is adjustable.

** Up to 2 sensor connections, digital or analog. Sensors can be purchased separately.

Rechargeable battery

The AT1000 Series feature a rechargeable battery. The built-in charger enables the device to recharge whenever it is connected to power. The device automatically notifies you of charging activity and battery status via alerts. The AT1000XT has the ability to recharge the battery in subzero temperatures.

Long battery life

Since the device only transmits when it needs to, activity-based transmission modes maximize battery life, delivering more time in the field and less time in the shop.

AT1000Series key features

- Compact and simple to install
- 3G HSPA network
- 4 activity-based transmission modes: stationary, moving, connected to power and change in sensor status.
- Onboard 3D accelerometer
- Emergency push button
- 2 configurable I/O sensors (available on AT1000 and AT1000XT)
- Durable IP67 certified casing
- Over-the-air configuration and firmware upgrades
- 1 year warranty
