

## ITS Electronic Fax

---

*The easy way to send and receive  
faxes from anywhere!*

---

Enjoy the value that our ITS Fax service will add to your business. With ease of use, you will be impressed by how quickly our Fax solution will become an instrumental tool for your business. In addition, there are a number of time and cost savings associated with using ITS Fax services.

### Lower Costs

With the ability to quickly delete unwanted or “junk” faxes from your computer, you will prevent your business from incurring the costs associated with printing these faxes on a traditional fax machine. This is just one of the many benefits available to you when using the ITS Fax solution.

### Key Benefits

- Easy to use - can send faxes from anywhere on any device
- Receive faxes anywhere as PDF email attachments or view them online 24/7/365
- Faxes are transmitted securely over an encrypted connection
- Faxes are stored in a password-protected account
- Get instant alerts by SMS, email, or on your computer when you have a new fax
- Easily send faxes to multiple numbers
- Powerful web portal

### How it works

With our advanced electronic fax solution, sending a fax is now as easy as printing. Anything on your PC that you can see can be faxed! It converts faxes to emails and emails to faxes as well as PC to fax and Web to Fax. You will have access to nationwide local fax to email numbers as well as local number portability ensuring your business keeps the fax number that you want. All of these features along side a powerful web portal to customize your fax's functionalities makes our ITS Fax solution a must have for your business.

### Easy to use web portal provides

- Real time web reporting - Create your own reports and download them into CSV or Excel
- Easy, one click resend capabilities
- Send and forget with auto-retry from within the network
- Web management of Accounts - view send and receive history by user

### ITS Secure Fax

ITS Secure Fax is HIPAA Compliant and is just as simple and easy to use as the standard ITS Fax solution. You receive an email containing a link when a fax arrives - the incoming faxes are stored on a secure password protected server.
