“News about IT Technologies that can help your business prosper”

Millbury, MA

Don't be a Sitting Duck!

If your business is the victim of a cybercrime attack where client or patient data is compromised, you stand to lose a LOT more than you might think.

According to state and federal laws, you will be required to tell your clients and/or patients that YOU exposed them to cybercriminals. You will then be investigated and questioned about what you did to prevent this from happening – and if the answer is not adequate, you can be found liable, facing serious fines and lawsuits EVEN IF you trusted an outsourced IT support company to protect you.

Your competition will have a heyday over this. Clients will be IRATE and leave in droves. Morale will TANK and employees will BLAME YOU. Your bank is NOT required to replace funds stolen due to cybercrime (go ask them), and unless you have a very specific type of insurance policy, any financial losses will be denied coverage.

Please do NOT underestimate the importance and likelihood of these threats. It is NOT safe to assume your IT company (or guy) is doing everything they should be doing to protect you; in fact, there is a high probability they are NOT, which we can demonstrate with your permission.

We've seen 3 clients have either near misses or minor incidents over the last 6 months. If you think "they aren't targeting me, we're too small", **YOU ARE WRONG!**

Even if you are one of our clients – PLEASE contact us. The Cyber Security threat landscape has changed DRAMATICALLY in the last few years. Our old best practices may not be enough for these new threats, and we are constantly adding new technologies to our defense grid. And if you've ever waived any of our recommendations, now is the time to rethink that.

So, whether you are an existing client of ours or not, our FREE, Confidential Cyber Security Assessment will reveal if you are a "sitting duck" for cybercriminals, or if you could recover quickly and without incident.

Free Report Outlines 7 Most Critical IT Security Protections Every Business Must Have In Place Now To Protect Themselves From Cybercrime, Data Breaches And Hacker Attacks

Get your free copy of this Executive Report to discover:
