

## Company Overview

Founded in Atlanta in 1999, Automated Solutions Consulting Group, Inc. (ASC Group) provides strategic technology consulting services for corporations, private schools, and healthcare facilities. ASC Group offers a reliable and predictable platform for our clients' investments in IT, allowing technology to enable higher operational productivity. We provide strategic technology planning and responsive, consistent technical support.

## Services Offered

ASC Group offers the following services on a project or contract:

- Cyber Security
- Network Design and Management
- Vulnerability and Security Assessments
- 24x7 Security Monitoring
- Ransomware Protection
- Regulatory Compliance
- Cloud Backup/Data Storage Solutions
- Strategic Technology Planning

## Have in-house IT staff?

Let us supplement your existing team. If you already have IT professionals on staff that provide systems administration and support, we can serve as a backup or specialized resource, serving in any or all of the following capacities:

- Senior-level network support (remote monitoring and management)
- Expert resource for special projects (Exchange migration, firewall implementation, etc.)
- Backup resource for IT staff in the event of vacation, sick leave.
- Procurement of specific hardware/software solutions not available on the retail market

## Don't have in-house IT staff?

Rather than hiring full-time employees to manage IT, many clients rely on ASC Group as their outsourced IT department. For these clients, ASC Group provides the following services:

- "Virtual CIO": Strategic technology planning
- Primary Systems Administrator (preventative maintenance, remote monitoring and management)
- Technical Support (onsite and on the phone)
- Procurement of hardware/software solutions
