

COMMON KNOWLEDGE TECHNOLOGY TIMES

What's New?

This newsletter is new! Common Knowledge Technology constantly tries to bring new value to our clients. Through this newsletter, we're hoping to share more of the good stuff we learn.

Throughout the year, keep an eye out for articles about our amazing CKT staff! Also coming, info about new products and services. We'll even keep it fun with some trivia and giveaways!

January 2020

This monthly publication provided courtesy of Peter Horewitch, President of Common Knowledge Technology.

Our Mission:

By making technology management simple, our clients can achieve more, have peace of mind, and understand the value of IT in their business.

Top Strategies I Learned To Fight Off Complacency And Get Out Of My Comfort Zone

Jesse Itzler is a man of many talents. He spoke at a recent conference this past fall and brought a lot of great business insight with him. Itzler got his start as a rapper in the early '90s. He worked with artists including Tone Lōc, wrote a song that made it to the Billboard Hot 100 ("Shake It Like A White Girl") and wrote and sang the New York Knicks theme song, "Go NY Go." He then went on to write the theme songs for over 50 other professional sports teams.

But it turned out that as much as he loved the music business, it wasn't his true passion. Itzler was an entrepreneur at heart. He had a lot of ideas he wanted to turn into reality. One of

those ideas stemmed from his short music career. In 1996, he founded Alphabet City Sports Records with a friend. The business served pro sports teams and remixed songs for their use. In 1998, Itzler and his friend sold the company.

Then in 2001, Itzler moved on to his next major venture: Marquis Jet. This company would quickly become one of the biggest and best-known private jet companies ever. They offered prepaid access to private jets, and it became wildly popular. In fact, in 2009, Warren Buffett's Berkshire Hathaway bought Marquis Jet (Berkshire Hathaway is also the parent company of NetJets,

Continued on pg.2

Continued from pg.1

which offers fractional ownership in private jets).

Itzler didn't stop there. He founded 100 Mile Group, a brand incubator. He partnered with ZICO Coconut Water, which exploded in popularity and was acquired by Coca-Cola. And to top it all off, he lived with a former Navy SEAL and wrote a book about the experience: *Living With A SEAL: 31 Days Training With The Toughest Man On The Planet*. All these accomplishments only scratch the surface of Itzler's professional life.

Itzler accomplished all of this over the last 30 years because he wasn't complacent. He routinely pushed himself out of his comfort zone and made choices to get to the next level. It's not an easy thing to do, but he knew that if he wanted to be successful, he had to push himself. It's something we all have to do.

One major piece of advice he offered to the Producers Club crowd was to differentiate. He used a great analogy: "Your brownies have to be different from all of the other brownies on the market." This was in reference to a brownie business he worked on in college. You must ask yourself how you're

"... he knew that if he wanted to be successful, he had to push himself."

going to stand out in the market, because chances are there's another guy out there offering the same thing you are. You have to set yourself apart. This is why Itzler got out of the rap game and started producing music for sports teams – he set himself apart.

Another strategy to fight complacency that he recommends is this: You need to put yourself in a position where luck will find you. You have to put yourself out there. Early in his career, Itzler was cold-calling all the way to the top. He'd cold-call CEOs to get their attention when he was working on his music career. Later, when he was running Marquis Jet, he was getting himself in front of celebrities like Matt Damon and Ben Affleck. He took major risks getting his name and company in front of influential people, but by being willing to take those risks, luck, as he put it, found him.

Another of his strategies that really stood out to me was when you have momentum, you have to double down and "hit the gas." For instance, when you accomplish a goal, go after even bigger goals. Complacency is what happens when you don't hit the gas. On top of that, you can't negotiate your goals and change them because you don't want to put the effort into doubling down. It's okay if how you get to the goal changes, but the final goal shouldn't change. After all, you set goals for a reason – you do want to push yourself; you just have to put in the effort.

Service Spotlight: Dark Web Scanning

There's a new saying in IT: "It's not a matter of IF you'll have a data breach, but WHEN." Even if you think "I'm a small company, I don't have any valuable information" that's simply not true. You still have your reputation to protect. 60% of business CLOSE THEIR DOORS after a cyber attack. These expert hackers and cyber criminals ALWAYS BREAK IN.

- This monthly service will first perform a scan to identify credentials tied to your company that have already been compromised. This allows us to seal any leaks that may have already started.
- Scans will continue to run constantly, alerting if any new data is found on the dark web. This proactive, first line of defense aids in preventing any data breaches.
- Get The Peace of Mind That Your Credentials, Company Financials and Customer Records are 100% SAFE!

Shiny New Gadget Of The Month:

Dell Latitude 9510 Laptop or 2-in-1

Just announced at CES 2020, this new ultra-premium Latitude will be available this spring with the latest 10th Gen Intel® Core™ i7 processors, Dell Optimizer's built-in AI, and a 15" InfinityEdge Screen in a portable 14" size. Sleek aluminum finish that starts at 3.2lbs, this is a perfect fit for any executive.

- ExpressResponse – improves performance by intelligently launching your most used applications faster
- Express Sign-in – Proximity sensor can tell when you're near for a faster secure log-in. It wakes when you approach and locks when you walk away.
- Express Charge – Adapts to your typical power consumption and charge patterns. Let's you charge up to 80% in one hour or up to 35% in 15 minutes.

6 Time Management Tips For The Busy Entrepreneur

Face it, there will never be enough hours in the day to accomplish everything you need to do. But if you methodically review how you spend your days and instill focus and discipline while completing daily priorities, you will soon find more time to work on the long-term success of your business. Here are six ways to do it.

1. CONDUCT A TIME AUDIT.

Sit down and review three months of activity. The data from the analysis will show where you spent your time (which projects, tasks and priorities demanded your attention) and with whom you collaborated to get the work done. The audit will also shed light on areas where you were distracted, where you were the most productive and which tasks/projects took more (or less) time than anticipated.

2. ELIMINATE TIME DRAINS.

These are the kinds of things that sneak up on you and steal time and can be better put to use growing your business. Look for these time drains: not delegating tasks, not managing meetings efficiently (Tip: always have an agenda!) and spending too much time writing/responding to e-mails. If you've done your job as a leader, members of your team can handle a majority of meetings and e-mails. You hired great people. Now let them do their jobs.

3. TAKE CONTROL OF YOUR CALENDAR.

Remember: you drive your schedule; don't let others drive it. Block time throughout your day and guard against changing your schedule to work on tasks that are not important or urgent. The way you allocate your time has a direct correlation to your effectiveness as a leader and, ultimately, the performance of your business. Prudent calendar management will also send a strong signal to your team that you take this seriously.

4. PLAN YOUR DAY.

When you know your priorities for the day, you will be better prepared to reset your work schedule if the unexpected comes your way. Once your schedule is set, block off chunks of time to work on your priorities. I recommend 90-minute blocks so you can concentrate on big-picture items or work on a group of related tasks. Stay disciplined and don't allow yourself to go over that allotted time.

5. LIMIT INTERRUPTIONS.

Now comes the hard part. Once you start working on each priority, you need to remain focused. Close the door and don't answer the phone unless it's a critical issue. Avoid checking e-mail. Don't let distractions slow you down.

6. HOLD YOURSELF ACCOUNTABLE.

Share your tasks, priorities and deadlines with a colleague. Meet with that person at least monthly to review how well you managed your time. The probability of success increases when you have someone watching your progress and coaching you across the finish line.

Andy Bailey is the founder, CEO and lead business coach at Petra, an organization dedicated to helping business owners across the world achieve levels of success they never thought possible. With personal experience founding an Inc. 500 multimillion-dollar company that he then sold and exited, Bailey founded Petra to pass on the principles and practices he learned along the way. As his clients can attest, he can cut through organizational BS faster than a hot knife through butter.

3 Tips You Need To Know To Protect Your Small-Business Data So You Don't Get Hacked

Change passwords every 90 days.

If you use the same password for everything (and you've been using that password for years), there's a good chance that passwords and related usernames have been stolen. When you don't change your password, you put yourself at HUGE risk. Thankfully, password managers like LastPass and 1Password make it easy to keep your passwords updated and secure.

Use two-factor authentication (2FA). Many services offer 2FA as an optional login feature. The problem is, they can't work if you don't use them. There are many types of 2FA, such as SMS

text verification, PINs and biometrics such as fingerprint or facial recognition.

Invest in employee education.

Your team should always know what's going on in the world of cyber security. They need to be very aware of phishing e-mails, fraudulent links and the importance of keeping their password updated.

Understanding these topics means your team is better equipped to deal with these issues as they arise. *Small Business Trends*, 9/11/2019.

Top Strategies For Leading Your Company Through Rapid Change

Technologies change and businesses change. Sometimes they happen faster than we'd like – and faster than we can adapt. It can be stressful. But there are strategies you can implement with your team in those moments when things start to move at a breakneck pace.

Keep everyone in the loop.

When change hits, stress levels can go through the roof. This stress can be tempered when you keep everyone in the loop. Everyone needs to know what is going on, and they also need to know that their feedback is being heard.

Define the future. As things change around you, one of the best things you can do is define your vision of the future. You need to know where you're going and how changes, in whatever form they take, are going to affect you and the business. What is your purpose?

Facilitate learning. This is crucial, especially as you introduce new technologies, systems or processes into the mix. You don't want to leave anyone behind. You want to make sure everyone has everything they need to come up to speed. Management needs to fully support their team. *Inc.*, 10/16/2019.
