

# HatchGuard Roof Hatch Guardrail

FACTORY SUPPLY INC.  
3412 49th Street North  
Saint Petersburg, FL 33710

## Free-Standing

HatchGuard, is a free-standing rooftop fall protection system, which is a non-penetrating. This rooftop guardrail system is designed to prevent workers from falling into open roof hatches.

## Free-Standing

These systems come engineered in a single crate; most parts are pre-assembled with easy to follow instructions and a single tool for installation. This free-standing, modular system is constructed with corrosion resistant lightweight aluminum tubing and utilizes counter weighted baseplates. It requires no rooftop penetration, which will help to make sure that your roof will remain intact; so you will not have to worry about any unexpected leaks occurring from using this system.

## Installation

The simplicity of HatchGuard allows for this system to be integrated with virtually all roof openings. This rooftop hatch guard system comes standard with a spring loaded gate to ensure that this fall prevention system is in a safe, operating, closed position at all times. Designed specifically to allow for the safe exit and entry of employees onto rooftops this fall prevention guardrail system will be a perfect addition to your rooftop safety systems.

## Baseplates

Our unique, low-profile, stackable baseplates are designed to weigh only 40 lbs and are engineered with a carry handle which allows for an easy, ergonomically friendly transportation and installation.
