

Roll Handling System

FACTORY SUPPLY INC.
3412 49th Street North
Saint Petersburg, FL 33710

Designed For

This double mast roll handling system automatically centres loads onto the Lift-O-Flex and can handle loads up to 400 pounds. This is done through the use of three squeeze masts, two of which are electrically powered and one is not.

Movement

The squeeze masts work together to grip and un-grip loads and have a total of 22 inches of arm mobility. This roll handling system adapts easily to different load sizes and is simple to configure and operate. This roll handling solution will not damage the products which it lifts because it works with controlled, gentle force throughout the operation.
