

90 ft Stainless Steel Cable Safety System

FACTORY SUPPLY INC.
3412 49th Street North
Saint Petersburg, FL 33710

Designed To

This stainless steel cable safety system is designed with a top and bottom bracket which act as anchors for a steel cable that runs the length of the climbing area.

Compliance

This system is a 2-user, stainless steel vertical safety system (vertical lifeline) that meets the new ANSI Z359.16 standard, along with OSHA 1910.140 and 1926.502, when used with the Lad-Saf X3 Detachable Cable Sleeve and Lad-Saf X2 Detachable Cable Sleeve.

How it Works

A sleeve connects the worker to the ladder cable guide system, which automatically follows the user during the climb and locks onto the cable in the event of a fall, allowing the user to regain their footing.

Installation and Safety

The system has been reengineered to simplify and speed up the installation process, weighing less and with fewer loose parts than our previous models. Additionally, the top bracket provides 100% tie-off capability through its integrated fall arrest-rated anchor point rated to 3,600 lbs.
