

Office Without Limits

Jomar Voice 3CX Virtual PBX

Jomar's Cloud-Hosted Virtual PBX, powered by 3CX Phone System, delivers new levels of communication and productivity by providing access to your business phone system from anywhere an Internet connection is available. With apps for Windows PC, Mac, iOS and Android, your extension can be with you anywhere you go.

10 Key Benefits of Jomar Voice Virtual PBX Hosting

1. Empowers employees to use their business phone extensions from anywhere.
2. Cloud hosted so your phone system keeps running during storms and power outages.
3. Reduce costs using the Internet and VoIP for telephone communications.
4. Flexible scalability lets your phone system grow with your business.
5. Use physical desk phones and conference phones or use free apps on any device.
6. All plans include unlimited extensions, voicemail boxes, digital receptionists, ring groups and queues.
7. Includes all popular business telephone system features and more!
8. Unified communications features allow integration with Microsoft Outlook and popular CRMs including Salesforce.
9. Minimal IT Requirements – Just plug in the phones and install the apps.
10. Includes 3CX WebMeeting video conferencing and collaboration platform.

How It Works

3CX Phone System runs on a highly redundant cluster of cloud servers and connects to any supported SIP software or hardware phone, and iPhones or Android smartphones can also be used as extensions using free apps. External phone lines are available from Jomar Voice, or you can use any supported VoIP provider.

3CX Makes Call Management a Breeze

3CX Virtual PBX frees the phone system from the office and desktop environments, delivering Unified Communications features such as voice and video conferencing, seeing the presence of your colleagues, corporate instant messaging, setting your status and more. Users can avoid using a cryptic phone interface by managing their extension and their calls with just a few mouse clicks on Windows and Mac machines, or directly from their iPhone or Android device.

Extensive Enterprise Level Feature Set

While traditional phone systems require additional hardware modules, as well as licensing and maintenance to add new features such as auto-attendants and call queuing, all of these come standard with 3CX Virtual PBX hosting. Additionally, 3CX Virtual PBX hosting integrates with popular CRMs such as SalesForce, Microsoft Dynamics and Sage ACT!

Unparalleled Mobility – Take Your Extension Anywhere

3CX is unique in its integration of PUSH Technology which means that 3CX can 'wake up' the phone when a call comes in. Android and iPhone smartphones wake up when a call or chat arrives, saving valuable battery time while still allowing you to be reachable on your extension. Slash company call costs by using 3CX mobile clients.

Bring Your Business & Customer Closer with 3CX WebMeeting

3CX is unique in its integration of PUSH Technology which means that 3CX can 'wake up' the phone when a call comes in. Android and iPhone smartphones wake up when a call or chat arrives, saving valuable battery time while still allowing you to be reachable on your extension. Slash company call costs by using 3CX mobile clients.
